**PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING
 DIVISIONAL APPLICATION UNDER 37 C.F.R. § 1.53(b)**

Sir:

This paper accompanies a Request for Filing Divisional Application Under 37 C.F.R. § 1.53(b) and associated filing fee therefor ("the Request"). If the fee payment is missing or insufficient in amount, or if any other fees are determined to be due, the Assistant Commissioner, Commissioner, and/or the Director of the U.S. Patent & Trademark Office is/are hereby authorized to charge any such fees (or credit any overpayment) to Winstead Sechrest & Minick Deposit Account No. 23-2426, referencing matter number 11321-P012USD5.

IN RE: APPLICATION OF SMALLEY ET AL.
PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING DIVISIONAL APPLICATION UNDER
37 C.F.R. § 1.53(b)

AMENDMENTS

In the Title

Please amend the title by replacing the present title with the following:

--ARRAY OF SINGLE-WALL CARBON NANOTUBES--

In the Abstract

Please amend the abstract by replacing the present abstract with the following:

--This invention relates generally to forming an array of single-wall carbon nanotubes (SWNT). In one embodiment, a macroscopic molecular array is provided comprising at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.--

In the Specification

Please amend the specification as noted on page 5, paragraph 11 of the Request by inserting before the first line of the specification the following:

--RELATED APPLICATIONS

This application is a division of co-pending prior U.S. patent application Serial No. 09/380,545, filed on September 3, 1999, entitled "CARBON FIBERS FORMED FROM SINGLE-WALL CARBON NANOTUBES," which is the 35 U.S.C. § 371 national application of International Application Number PCT/US98/04513 filed on March 6, 1998, which designated the United States, claiming priority to: provisional U.S. patent application Serial Number 60/067,325, filed on December 5, 1997; provisional U.S. patent application Serial Number 60/064,531, filed on November 5, 1997; provisional U.S. patent application Serial Number 60/063,675, filed on October 29, 1997; provisional U.S. patent application Serial Number 60/055,037, filed on August 8, 1997; provisional U.S. patent application Serial Number 60/047,854, filed on May 29, 1997; and provisional U.S. patent application Serial Number

IN RE: APPLICATION OF SMALLEY ET AL.
PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING DIVISIONAL APPLICATION UNDER
37 C.F.R. § 1.53(b)

60/040,152, filed on March 7, 1997. Each of the foregoing applications is commonly assigned to the assignee of the present invention and is hereby incorporated herein by reference in its entirety.

This application discloses subject matter related to the subject matter of U.S. patent application Serial Number 10/000,746, filed on November 30, 2001 in the name of Daniel T. Colbert et al., entitled "MACROSCOPICALLY MANIPULABLE NANOSCALE DEVICES MADE FROM NANOTUBE ASSEMBLIES," which application is commonly assigned to the assignee of the present invention.--

In the Claims

Please amend the claims as follows:

A. Please cancel claims 1-80, 91-103, 106-110 and 113-162 without prejudice or disclaimer to the subject matter thereof.

B. Please amend claim 104 as follows:

104. (Amended) A solar cell for converting broad spectrum light energy into electrical current comprising a molecular array as the photon collector, wherein the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.

C. Please amend claim 111 as follows:

111. (Amended) A microporous anode for an electrochemical cell comprising a molecular array, wherein the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.

IN RE: APPLICATION OF SMALLEY ET AL.
PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING DIVISIONAL APPLICATION UNDER
37 C.F.R. § 1.53(b)

D. Please amend claim 112 as follows:

112. (Amended) A lithium ion secondary battery comprising an anode, a cathode comprising LiCoO_2 and an aprotic organic electrolyte wherein,

- (a) a fullerene intercalating compound of lithium forms at the anode under charging conditions,
- (b) the anode comprises a molecular array; and
- (c) the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.

REMARKS

A. *Status of the Application.* On September 3, 1999, Applicant filed the parent patent application, U.S. patent application Serial No. 09/380,545, which included originally filed claims 1-162. In an Office Action, dated June 20, 2000, ("the Office Action") the Examiner subjected the claims to a restriction requirement. According to the Office Action, the parent patent application's claims were directed to eleven (11) distinct inventions. Applicant elected the invention of Group VIII in the parent patent application. The present divisional application is directed to the invention of Group V, which were identified as the invention claimed by originally filed claims 81-90, 104-105 and 111-112.

Accordingly, originally filed claims 81-90, 104-105 and 111-112 remain in the application, and the other originally filed claims -- claims 1-80, 91-103, 106-110 and 113-162 -- are cancelled herein without prejudice or disclaimer to the subject matter thereof.

B. *Amended Claims.* Claims 104, 111 and 112 are amended herein. The Applicant respectfully asserts that the amendment to claims 104, 111 and 112, and incorporated by reference in any claims depending therefrom, are not narrowing amendments made for a reason related to the statutory requirements for a patent that will give rise to prosecution history estoppel. *See Festo Corp. v. Shoketsu Kinzoku Kogyo Kabushiki Co.*, 234 F.3d 555, 566, 56 U.S.P.Q.2d 1865, 1870 (Fed. Cir. 2001).

IN RE: APPLICATION OF SMALLEY ET AL.
PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING DIVISIONAL APPLICATION UNDER
37 C.F.R. § 1.53(b)

Attached hereto is a marked-up version of the changes made to claims 104, 111 and 112 by the current amendment. The attached page is captioned **"Version with Markings to Show Changes Made."**

CONCLUSION

It is believed that each of the claims now pending in the present application recites elements neither taught nor suggested by the prior art. Further, it is believed that the application as a whole is in proper form and condition for allowance. If the Examiner believes that the application may be placed in even better condition for allowance, he or she is invited to contact the undersigned at the telephone number noted below. Alternatively, or in addition, if the Examiner believes that an Examiner interview would be beneficial, the Examiner is invited to note that the undersigned has ready access to the videoconferencing facilities of the South Central Intellectual Property Partnership at Rice University in Houston, Texas. The inventors and the undersigned would welcome the opportunity to use those facilities to clarify any issues deemed to remain unresolved.

Respectfully submitted,

Ross Spencer Garsson

ATTORNEYS FOR ASSIGNEE

IN RE: APPLICATION OF SMALLEY ET AL.
PRELIMINARY AMENDMENT ACCOMPANYING REQUEST FOR FILING DIVISIONAL APPLICATION UNDER
37 C.F.R. § 1.53(b)

Version with Markings to Show Changes Made

104. (Amended) A solar cell for converting broad spectrum light energy into electrical current comprising a molecular array [according to claim 81] as the photon collector, wherein the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.

111. (Amended) A microporous anode for an electrochemical cell comprising a molecular array, wherein the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers [according to claim 81].

112. (Amended) A lithium ion secondary battery comprising [the] an anode [of claim 111], a cathode comprising LiCoO_2 and an aprotic organic electrolyte wherein,

(a) a fullerene intercalating compound [(FIC)] of lithium forms at the anode under charging conditions,

(b) the anode comprises a molecular array; and

(c) the molecular array comprises at least about 10^6 single-wall carbon nanotubes in generally parallel orientation and having substantially similar lengths in the range of from about 5 to about 500 nanometers.
